

PELASPAN® BIO

HOME COMPOSTABLE, EFFICIENT
AND VERSATILE

PELASPAN® BIO IS EXCEPTIONALLY ECO-FRIENDLY AND POURABLE PADDING MATERIAL.

Developed by Storopack, PELASPAN® BIO is an exceptionally eco-friendly, pourable loose fill padding material.

Our PELASPAN® BIO is certified in accordance with NF T51-800 making it home and garden compostable. The packaging chips are mainly made from starch. Due to their tried-and-tested S-shape, the organic packaging peanuts interlock to create a coherent cushion that blocks, braces, and stabilizes your goods and prevents them from knocking against each other.

The all-around cushioning consisting of organic packaging peanuts goes into the carton simply and quickly and can be easily integrated into any packing process. If desired, Storopack's packaging specialists can help you with the integration process and provide individual solutions.

DIN-GEPRÜFT HOME COMPOSTABLE

PELASPAN® BIO can be disposed of on the compost and decomposes without toxic residues.

PELASPAN® BIO
