

SUSTAINABILITY REPORT

SUMMARY

SUSTAINABILITY MEANS THINKING ABOUT TOMORROW, TODAY.

Sustainability encompasses many aspects.

Whether environmental, economic, or social issues, the underlying principle is the same, i.e. to live in a way that enables future generations to have a life that is just as good as – or even better than – our own. As a family-run company, we take these principles extremely seriously. That's why they guide our decisions and our day-to-day activities. We are conscious of our responsibilities to our employees, as well as to the environment and society.

The Storopack Vision & Guidelines form the foundation of our activities and define what Storopack represents. They also underpin our approach on sustainability:

OUR AREAS OF CORE COMPETENCE LIE IN FIRST-CLASS PACKAGING SOLUTIONS AND MOLDED PARTS.

Any product damaged in transit is not only frustrating for the recipient, but also harmful to the environment. The process of returning the damaged product, manufacturing and shipping a replacement consumes far more energy and resources than the use of a suitable packaging solution. That is why our solutions ensure that our customers' products can be transported safely.

TOGETHER WITH OUR CUSTOMERS AND SUPPLIERS WE DEVELOP AND SUPPLY INNOVATIVE SOLUTIONS.

We are committed to innovative and sustainable solutions when developing new products. Our aim is to use as many renewable and recycled plastics as possible.

GOOD SUPPLIERS CAN BECOME STRATEGIC PARTNERS.

As a long-standing customer of chemical company BASF, Storopack was selected to test the new chemically recycled raw material Styropor® Cycled in the production of EPS packaging. We are breaking new ground together with BASF when it comes to reusing plastics.

Our three pillars for more sustainability are led by our Vision & Guidelines. They form the basis of everything we do in regards to sustainability.

30%

In 2019, more than 30% of our in-house products were made from renewable or recycled materials.

“As a family-run global company, we take sustainability seriously and therefore attach great importance to maintaining and improving quality of life for future generations.”

**HERMANN REICHENECKER,
CHAIRMAN OF THE MANAGEMENT BOARD,
STOROPACK**

OUR GOAL FOR 2025

USING AT LEAST

50%

**RAW MATERIALS MADE FROM
RECYCLED OR RENEWABLE
RESOURCES**

THREE PILLARS FOR MORE SUSTAINABILITY

**INNOVATIVE,
SUSTAINABLE, AND
RESOURCE-SAVING
PRODUCTS**

We are committed to offering perfect protective packaging and top-class molded parts. Design, recycling, and sustainability take center stage in terms of product development. Our product portfolio already includes many products that are made using recycled or renewable raw materials.

PRODUCTS FROM RECYCLED RAW MATERIALS

- ▶ AIRplus® Recycle
- ▶ FOAMplus® 5504R
- ▶ PAPERplus® recycled paper
- ▶ PELASPAN®
- ▶ Styropor® Cycled™
- ▶ rEPS

PRODUCTS FROM RENEWABLE RESOURCES

- ▶ PAPERplus® Classic Grass
- ▶ AIRplus® Bio
- ▶ PAPERplus® paper pads
- ▶ PELASPAN® BIO
- ▶ BIO-BASED

**INTERNAL
INITIATIVES**

Acting sustainably begins long before we turn raw materials into our products. Therefore, we take various internal measures to optimize our carbon footprint and ensure efficient energy management.

EcoDesign

The EcoDesign tool is a system for evaluating the life cycle assessment of our products. The key focus is on reducing the amount of material used while maintaining the same level of quality, which requires evaluation and comparison of all the effects and impacts of our products on the environment.

Energy Efficiency

We are committed to efficient energy management and continuously optimize the energy footprint of our locations.

**COLLABORATIVE
INITIATIVES**

ALLIANCE TO END PLASTIC WASTE

We are also the exclusive sponsor of the coastal cleaning program **Big Blue Ocean Cleanup**, with Storopack employees lending hands-on support to beach cleanups.

Alliance to End Plastic Waste, aims to free the environment from excess plastic and develop innovative ideas for expanding the recycling infrastructure.

By participating in **Operation Clean Sweep**, we are making an important contribution to protecting the environment against plastic pollution.

STOROPACK – PERFECT PROTECTIVE PACKAGING

Wherever in the world you send your products, we want them to be well protected while in transit.

SUSTAINABILITY MEANS TRUSTING NATURE.

New, more sustainable raw materials are a great way to protect the environment and natural resources. This is why many of our products are made using renewable or recycled materials and can be recycled themselves after use.
