

DRAINplus

EFFICIENT DRAINAGE

DRAINplus COMBINES OPTIMAL DRAINAGE AND EASE OF HANDLING.

DRAINplus by Storopack is a drainage and infiltration system, which is a preassembled all-in-one system suitable for multiple applications, including drainage of collected water, gradual infiltration of rainwater into the ground, and water treatment. DRAINplus provides users with an efficient drainage solution featuring a large absorption surface that can take in a high volume of water. Made from recycled material, DRAINplus itself is 100 percent recyclable.

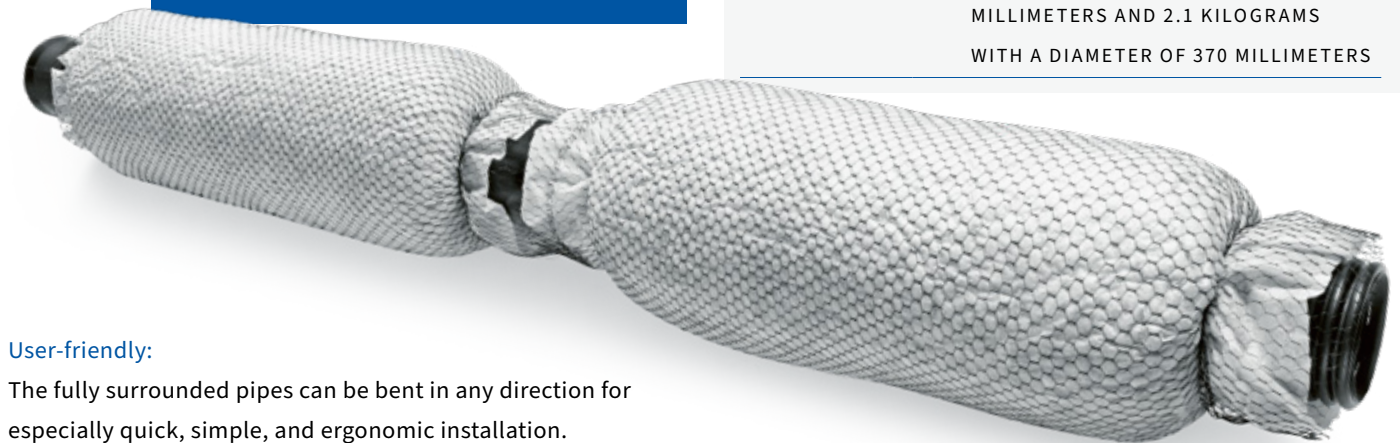

DRAINplus by STOROpack

AVAILABLE OPTIONS:

The pipes come in lengths of one, three, or six meters and a diameter of 110/300 millimeters or 160/370 millimeters (pipe diameter/ DRAINplus diameter). All of the pipe variants are available in the SN 4 and SN 8 classifications.

DRAINplus AT A GLANCE

Flexible	<ul style="list-style-type: none">▶ CAN BE INSTALLED HORIZONTALLY OR VERTICALLY AND CONNECTED LENGTHWISE OR ON AN INTERCONNECTED LEVEL▶ CAN BE BENT IN ANY DIRECTION
Efficient	<ul style="list-style-type: none">▶ THANKS TO THE LARGE ABSORPTION SURFACE OF UP TO 1.25 SQUARE METERS PER LINEAR METER, TAKES IN A HIGH VOLUME OF WATER
Eco-friendly	<ul style="list-style-type: none">▶ MADE FROM RECYCLED MATERIAL AND 100 PERCENT RECYCLABLE▶ LOW CARBON FOOTPRINT THANKS TO SHORT TRANSPORT ROUTES
Lightweight	<ul style="list-style-type: none">▶ ONE METER OF PIPE WEIGHS JUST 1.4 KILOGRAMS WITH A DIAMETER OF 300 MILLIMETERS AND 2.1 KILOGRAMS WITH A DIAMETER OF 370 MILLIMETERS

User-friendly:

The fully surrounded pipes can be bent in any direction for especially quick, simple, and ergonomic installation.

DRAINplus MEANS TO DRAIN EFFICIENTLY.

Whether to drain collected water, as rainwater infiltration or for water treatment - the preassembled all-in-one DRAINplus system can be used for various applications. With DRAINplus, users get an efficient drainage solution that is easy and quick to install.
