

AIRplus® Void Recycle

Sustainable and Highly Efficient: AIRplus® Void Recycle

AIRplus® Void Recycle is ideal for companies that value sustainability: the Storopack film type consists of polyethylene and at least 50 percent recycled material, which comes in part from Storopack's in-house production and is fed back into the film production process in the form of recycled plastic granules. AIRplus® Void Recycle air pillows are suitable for light to medium-weight products and delivering the same outstanding packaging performance as conventional AIRplus® cushioning. AIRplus® Void Recycle air pillows can also be recycled again and so conserving resources over the long term.

AIRplus® Void Recycle at a Glance

- Made from at least 50 percent recycled material
- Available in rolls measuring 1,125 metres in length
- Can be used to create Void air cushions measuring 200 × 65, 200 × 120, and 200 × 175 millimetres
- Suitable for all AIRplus® air cushion systems that use Void film
- For light to medium-weight products
- The recycled material comes partly from the Storopack production process

Storopack – Perfect Protective Packaging

Wherever in the world you send your products, we want them to be well protected while in transit.

Optimal Protection with Air Cushions

Our AIRplus® packaging system optimally protects your products with air cushions in a variety of forms. Whether wrapping fragile shipping goods or filling voids, AIRplus® air cushions are versatile, especially light, reduce transport costs, and can be reused or recycled.
