

MOLDING

rEPS

EPS MADE FROM 100 PERCENT
RECYCLED MATERIAL

STOROpack

PERFECT PROTECTIVE PACKAGING

rEPS MEANS CUSTOMIZED YET SUSTAINABLE PACKAGING.

rEPS (recycled expanded polystyrene) is made from 100 per- cent recycled post-consumer EPS waste. Up to 100 percent of this material can be used to make new protective packaging. As such, rEPS represents an exceptionally attractive solution for companies that wish to ship their goods precisely and

safely while taking sustainability seriously. rEPS retains the packaging properties of conventional EPS and is therefore ide- ally suited as transport packaging for sensitive products that require customized protection.

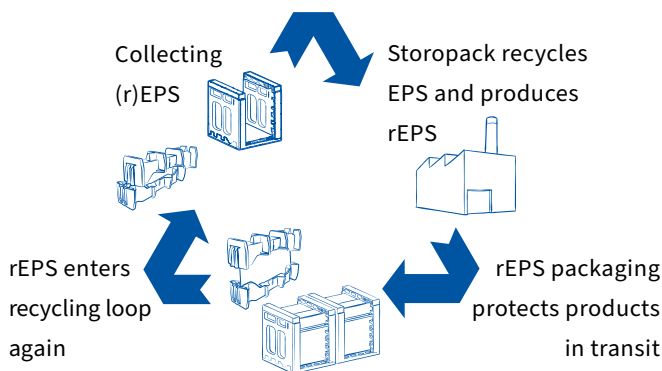

rEPS AT A GLANCE

- ▶ CONSISTS OF 100% RECYCLED EPS
- ▶ THE PROTECTIVE PACKAGING CAN BE PRODUCED WITH UP TO 100% OF THIS RAW MATERIAL
- ▶ SIMPLE AND EFFICIENT CYCLE FOR EPS PROTECTIVE PACKAGING
- ▶ AVAILABLE IN WHITE AND GREY
- ▶ MAINTAINS THE IMPORTANT PACKAGING PROPER- TIES OF VIRGIN EPS

SIMPLE AND EFFICIENT CYCLE

With rEPS Storopack is breaking new ground when it comes to fully closing the recycling loop for EPS protective packaging. Storopack is the first manufacturer with a fully integrated production process for the new material. Both the recycling and the production of rEPS beads take place exclusively at the company's own locations.

STOROPACK - PERFECT PROTECTIVE PACKAGING

Wherever in the world you send your products, we want them to be well protected while in transit.

SUSTAINABILITY MEANS RELYING ON INNOVATIVE SOLUTIONS.

Our mission is to provide perfect protective packaging and first-class molded parts. For this purpose new, more sustainable raw materials are a great way to protect the environment and natural resources. This is why many of our products are made using renewable or recycled materials and can be recycled after use.
