

CL-SYSTEM

RELIABLE PROTECTION FOR
TEMPERATURE SENSITIVE MEDICATIONS

HEALING POWER IS WHEN VITAL MEDICATIONS ARRIVE SAFELY.

Whether cytostatics, vaccines, parenterals or medical samples - pharmacies, clinics and laboratories often need to get important medications to patients in the ward or other locations uncompromised, often in a short period of time.

OPTIMAL TEMPERATURE GUARANTEED

Storopack's CL-System ensures that temperature sensitive medications and samples arrive at their destination at the appropriate temperature. This is made possible by the proven phase change material (PCM) technology of the accumulators made of robust, hard plastic, which

guarantees temperature ranges down to -15°C, 2-8°C or 15-25°C in winter and summer alike.

The CL-System is the ideal solution for more than just the optimal temperature. The boxes for temperature-controlled transport close up tightly and feature additional sealing. They are also equipped with a liner so that the shipments can be conveniently prepared. The system solution is made of durable EPP, it can be used repeatedly, effectively cleaned, and still maintain its clean appearance for local and nationwide distribution.
